

ANDREAS HAUSLEITNER

Software Engineer, Entrepreneur, Musician

A PASSIONATE SOFTWARE ENGINEER WITH A HIGH ENTREPRENEURAL SPIRIT.

As a co-founder of software companies as well as having been involved in several software projects and international research I can offer more than 20 years of experience in software development and related IT & Management issues.

Besides serious work I love to ride mountain bikes and enjoy playing Bass.

I am interested in a position as a CTO in a Tech/IT-Startup or the like. You can also hire me for small and short term projects.

Adresse : based in Vienna/Austria and travelling the world.

RESUME

I grew up on the countryside and moved to Linz, Upper Austria to study computer science. To establish and grow our first software company I moved to Vienna, Austria. As a passionate "fullstack" software engineer with an entrepreneurial spirit I co-founded two companies (both got acquired). After having spent some time travelling and on re-educating on the latest technologies I went for a new challenge and co-founded another company. Expectations are high.

I am a discoverer at heart and I am always interested in new technologies and trends.

In my spare time I love to ride mountain bikes with friends and enjoy playing Bass and Guitar.

My selected projects

2017 - now

Founder – *Modocu Software GmbH*
Smart and effective mobile On-Site Documentation.
Promptly documented, organized and everywhere available.
More at www.modocu.com

current
